# Supercharge your portfolio's growth with the Google for Startups Cloud Program

Investor-backed startups get financial, technical, and business support that scales with them. They'll build with intelligent, cost-effective, proven technology that lets startups move fast.

How it Works

	Early	**Growth**
Eligibility	Pre-seed up to Series A[2] startups (Series A raised within 1 year)	Series A+ startups
Offer[1]	**Year 1:** GCP credits covering 100% of Google Cloud costs up to $100k **Year 2:** GCP Credits covering 20% of Google Cloud costs up to an additional $100k	Select startups qualify for additional technical and financial support for migrations. Work with your portfolio companies' sales coverage partners for custom offers.

Benefits for your Portfolio

Access to dedicated startup experts, cloud credits, and tools built for speed & insights

✓ **Business**

Your portfolio companies get tailored support from the Startup Success Team and our sales teams – their point of contact for any questions. Beyond credits, this ranges from collaborating and mentoring on your business needs to connections within Google teams to migration specific support through their journey.

✓ **Technical**

Your portfolio companies gain access to dedicated product and technical expertise, one-to-one guidance from Google engineers, mentoring, technical training, and resources.

✓ **Financial**

In addition to Cloud credits, portfolio companies may receive credits and benefits for Google Workspace, Google Maps, Google Ads, Google Play, Qwiklabs, and more.
